

# Hobbyline BPIR Declaration

Version: v1

## Designated building product: Class 1

---

### Declaration

SKAPE LIMITED has provided this declaration to satisfy the provisions of Schedule 1(d) of the Building (Building Product Information Requirements) Regulations 2022.

---

### Product/system

Name	Hobbyline
Line	
Identifier	HOBBYLINE

---

### Description

Budget-friendly Hobbylinewood with a poplar core and a B/BB radiata pine veneer, ideal for most DIY projects that do not require structural support.

Hobbyline is perfect for economical interior linings and various non-structural applications. This non-structural radiata pine Hobbylinewood is competitively priced and available in a wide range of thicknesses. Made from B/BB Radiata Pine veneers pressed onto a poplar core; it offers an affordable solution for various DIY projects and non-structural applications.

### FEATURES

- B/BB Radiata Pine face veneers
- Poplar core
- Non-Structural Hobbylinewood
- Warm golden-brown appearance
- Natural product and is subject to sine variation in colour, grain and texture

### BENEFITS

- B/BB Paint Grade Finish that takes stains, paints, oils and polyurethanes well
- Lightweight and easy to handle

## DIMENSIONS

Sheet Size	Thickness
2400 x 1200 mm	6.5, 9, 12, 15, 18, 21 mm
2700 x 1200 mm	9, 12 mm
3000 x 1200 mm	12 mm

---

## Scope of use

- Wall and ceiling lining
- Hobby/DIY projects

---

## Conditions of use

- Hobbyline are non-structural and untreated limiting them to interior use.

---

## Relevant building code clauses

**B1 Structure** – B1.3.1, B1.3.2, B1.3.3 (j), B1.3.4

**F2 Hazardous building materials** – F2.3.1

---

## Contributions to compliance

- B2 Durability B2.3.1 (c)
- F2 Hazardous Building Materials F2.3.1
- B2/AS1 Table 1.
- F2 - EN 636

---

## Supporting documentation

The following additional documentation supports the above statements:

## Building code performance clauses

### B1 Structure

#### B1.3.1

*Buildings, building elements and sitework* shall have a low probability of rupturing, becoming unstable, losing equilibrium, or collapsing during *construction* or *alteration* and throughout their lives.

#### B1.3.2

*Buildings, building elements* and *sitework* shall have a low probability of causing loss of amenity through undue deformation, vibratory response, degradation, or other physical characteristics throughout their lives, or during *construction* or *alteration* when the *building* is in use.

#### B1.3.3

Account shall be taken of all physical conditions likely to affect the stability of *buildings, building elements* and *sitework*, including:

- (j) impact

#### B1.3.4

Due allowances shall be made for:

- a. the consequences of failure,
- b. the intended use of the *building*,
- c. effects of uncertainties resulting from *construction* activities, or the sequence in which *construction* activities occur,
- d. variation in the properties of materials and the characteristics of the site, and
- e. accuracy limitations inherent in the methods used to predict the stability of *buildings*

## F2 Hazardous building materials

#### F2.3.1

The quantities of gas, liquid, radiation or solid particles emitted by materials used in the *construction* of *buildings*, shall not give rise to harmful concentrations at the surface of the material where the material is exposed, or in the atmosphere of any space.
