

Bendy Ply

This lightweight, flexible panel enhances your project's shape and form. Bendy Ply is available in both cross and long grain.

Manufactured using several veneers running in the same direction giving it a high amount of flexibility. The veneers can be laid either along the sheet or accross the sheet depending on which way you want to curve. Its open-grained texture allows the outer veneer layer to expand and the inner layer to compress, making it highly flexible.

Bendy Ply

FEATURES

- Flexible and lightweight
- Available in cross or long grain
- Can be bent into various shapes, even tight curves without cracking or splitting
- Flexibility allows for smooth transitions, minimizing visible seams
